INTRODUCTION

Software Engineer with over **2 years of experience in Flutter mobile development** and a solid foundation in **native iOS development (Swift)**. Proactive in adopting modern software architectures, with a strong growth mindset. Eager to contribute to cross-functional teams, leveraging both cross-platform and native technologies to deliver high-quality mobile solutions.

Long-term: My goal is to contribute to successful software projects, consistently deliver high-quality results, maintain strong performance, and be recognized as a reliable and valuable Software Engineer within engineering teams.

EDUCATION

University of Information Technology - UIT

06/2021 - 06/2025

Bachelor of Information System - GPA: **3.16**

Member, Organizing Committee – Social Work Team, University of Information Technology (2022 – 2025)

Outstanding Organizing Committee Award Recipient

EXPERIENCE

VNPT | Mobile Developer | 📍 Ho Chi Minh City

05/2026 - Present

- VNPT is a leading telecommunications and technology corporation in Vietnam, delivering large-scale digital transformation, cloud, AI, and telecommunications solutions to millions of consumers, enterprises, and government organizations nationwide.
- Joined the team responsible for developing mission-critical mobile applications focused on incident reporting, emergency communication, SOS response, and operational coordination, supporting rapid information exchange and response in urgent situations.

Yody | Mobile Developer | 📍 Ho Chi Minh City

03/2026 - 05/2026

- Developed a **mini internal chat application** integrated with **AI-powered backend services** to answer company-related queries, improving internal information access.
- Contributed to building a **monorepo-based e-commerce mobile application**, focusing on establishing a shared **core codebase** to ensure modularity, scalability, and consistency across features.
- Participated in **code reviews**, technical discussions, and collaborative development practices, helping maintain code quality and engineering standards across the team.

Suga Group | Mobile Developer | 📍 Ho Chi Minh City

05/2025 - 03/2026

- Developed and maintained the **Smart Locker App**, integrating multiple **mini-Flutter apps** (E-Shop, Web Food Order, Charity) with centralized payment flows and inter-app communication.
- Improved app maintainability and modularity by implementing **Clean Architecture**, separating data, business logic, and UI layers; managed state with **MobX/GetX**.
- Built a **Food Web Application** using Flutter Web, embedded via in-app WebView, triggered through deep links.
- Integrated third-party payment solutions (**Payoo, PayME, VNPay, MoMo**) into iOS and Android apps, ensuring stable and secure flows.

HPT Vietnam Corporation | Mobile Developer Intern | 📍 Ho Chi Minh City

11/2024 - 03/2025

- Designed and developed a **chat application** with real-time communication using WebSocket, including attachments, file sharing, and conversation management.

APT Team | Mobile Developer Intern - Freelancer | 📍 Ho Chi Minh City

06/2024 - 09/2024

- Implemented authentication flows and food ordering flows for the **VivuShip** app (motorbike, car rides, and food delivery).

TECHNICAL SKILLS

Programming Languages: Dart, Swift (Intermediate), C++ (Familiar), HTML/CSS (Intermediate)

Mobile Development: Flutter (Strong), iOS (Swift), Android (Java, Kotlin), React Native (Familiar)

Architecture & State Management: Clean Architecture, MVVM, Bloc, Riverpod, MobX

Backend & Database: Firebase, PostgreSQL, SQL Server, MongoDB, Supabase

Tools & Workflow: GitLab (CI/CD), Jira, Android Studio, Xcode, VS Code, Postman, Figma, Cursor, AntiGravity

PROJECTS

YodyEcom (Team size: 10 | Role: Mobile Developer)

- Collaborated with the core team to structure the project foundation using a Monorepo approach, integrating Clean Architecture, Riverpod, and a centralized design system.
- Assisted in creating custom tooling to automate boilerplate generation, reducing module setup time and accelerating the development of core e-commerce features.

Tech stack: Flutter, Dart, Firebase, Provider, Riverpod.

Santa Pocket (Team size: 8 | Role: Mobile Developer)

- Maintained and enhanced a 6-year production smart locker ecosystem supporting contactless **Send – Receive – Rent** workflows.
- Developed delegated pickup authorization, real-time locker status tracking, and 24/7 Smartbox operation monitoring.
- Designed modular mini-app architecture enabling E-Shop and Charity services within a unified super-app framework.
- Maintained secure multi-gateway payment processing (MoMo, VNPay, Payoo, PayME, SantaXu) with transaction state reconciliation and webhook integration.
- Implemented Google Maps integration, deep link routing, push notifications, OAuth2 authentication, and WebView lifecycle optimization.

Tech stack: Flutter, Dart, Firebase, GetX, MobX, Google Maps API, In-App WebView, Localization.

SantaFood (Team size: 8 | Role: Flutter Developer)

- Developed a Flutter Web-based food pre-ordering platform integrated within the SantaPocket ecosystem.
- Implemented full ordering lifecycle: restaurant listing, cart management, scheduling, locker location selection, and order confirmation.
- Optimized deep-link navigation and WebView communication layer to ensure seamless execution within the Super App container.

Tech stack: Flutter Web, Dart, Firebase, MobX, Google Maps API.

ACHIEVEMENTS

- | | |
|--|---------|
| • Second Prize in Informatics at the Provincial Excellent Student Competition | 04/2021 |
| • TOEIC 610 (Listening & Reading) | 08/2023 |
| • Foundations of User Experience (UX) Design Google Certificate | 05/2026 |
